The screenshot shows a Postman interface for a POST request to the endpoint `((baseUrl))/(?ver)/schedule/createPersonal`. The request body is a JSON object with the following fields: `description` (igemAPI), `title` (igemAPI), `startAt` (2022-10-07T07:00:00+03:00), `endAt` (2022-10-07T07:30:00+03:00), and `token_global` (myToken). The response status is 200 OK, and the response body is a JSON object with `data` (null) and `errors` (an array of two error objects). The error objects indicate that the `color` and `backgroundColor` fields are required.
